AG METAL
S.A. DE C.V.

COMPANY PROFILE

Industrial steel fabrication

Carbon and stainless steel equipment, built to each project’s requirements.

Monterrey, Nuevo León, Mexico

www.ag-metal.com.mx

Fabrication to specification

AG METAL S.A. de C.V. manufactures industrial equipment and components in carbon and stainless steel. We work to the requirements of each project.

Documented quality

Our quality system is based on ISO 9000 principles. We maintain manufacturing records, material certificates and documented test results.

- Specifications agreed with the customer.
- Personnel experienced in industrial fabrication.
- Work procedures and appropriate use of equipment.

Facilities in Monterrey

Fabrication, technical support and material handling areas in San Nicolás de los Garza, Nuevo León.

1,100 m²	Workshop building
300 m²	Personnel services, warehouse, maintenance and security
325 m²	Administrative and technical offices
2,500 m²	Maneuvering and storage yard

Inside the AG METAL workshop

Two overhead bridge cranes rated at 10 tons each.

Fabrication capabilities

Processes and equipment for fabrication to project specifications.

Plate rolling	Up to 1/2 in thick and 72 in wide.
Hydraulic press	250 t.
Cutting	Plasma and oxy-fuel cutting.
Welding	Fabrication in carbon and stainless steel.
Forming and drilling	Torispherical heads, column drills and magnetic drills.

Workshop equipment

Capability for each job is confirmed according to material, geometry and fabrication requirements.

Pressure vessels

We manufacture custom pressure vessels for industrial applications in carbon and stainless steel.

- Scope based on drawings and specifications.
- Material certificates and manufacturing records.
- Documented test results.

Applications: chemical and process plants, energy and industrial projects.

Carbon steel pressure vessel

Storage and process tanks

Tanks and reactors for industrial applications, fabricated to each project’s agreed requirements.

Carbon steel storage tanks

Stainless steel stirred reactor

Heat exchangers

Fabrication of heat exchangers and coils for industrial process applications. The portfolio includes stainless steel equipment for the chemical industry.

Stainless steel heat exchanger

Heat exchanger fabrication detail

Water and air treatment

Filtration tanks, multimedia and sand filters, dust collector components and packaged plants built to customer specifications.

Wastewater treatment equipment

Water treatment components

Piping and specialized fabrication

Custom components and assemblies for industrial projects in carbon and stainless steel.

Carbon steel piping and fittings

Lead ingot conveyor

Ducts, stacks and expansion joints. Hoppers, silos, conveyors and steel structures.

Your next fabrication project

For a quotation, share drawings, material, dimensions or capacity, operating requirements, quantities and delivery destination.

We use this information to define the fabrication scope.
